

Why?

Did you know that up to 40% of hospitalised patients are affected by disease-related malnutrition?

How does it affect you?

Malnutrition leads to:

1. Increased healthcare costs
2. Prolonged length of stay for patients
3. Unfavourable prognosis for patients

When & Where?

On 31st January 2008.

In European hospitals, Intensive Care Units and nursing homes

Who?

Be one of the many European hospitals taking part and creating a supportive environment – share best practice, improve standard of care through benchmarking

nutritionDay
IN EUROPE

The solution

nutritionDay is a one-day multi-centre audit to help you improve patient safety and quality of care

What to do?

1. Visit www.nutritionday.org and register.
2. Follow the steps.
3. Participate in 2008.
4. Receive individual reports as well as intra-European comparison data for benchmarking.
