Why?
Did you know that up to 40% of hospitalised patients are affected by disease-related malnutrition?

How does it affect you?
Malnutrition leads to:
1. Increased healthcare costs
2. Prolonged length of stay for patients
3. Unfavourable prognosis for patients

When & Where?
On **6th November 2014**.
In hospitals, Intensive Care Units and nursing homes

Who?
Be one of the many worldwide hospitals or nursing homes taking part and creating a supportive environment - share best practice, improve standard of care through benchmarking.

What to do?
1. Visit [www.nutritionday.org](http://www.nutritionday.org) and register.
2. Follow the steps.
4. Receive individual reports as well as a specialty based comparison for benchmarking.

The solution
nutritionDay is a one-day multi-centre audit to help you improve patient safety and quality of care.
