nutritionDay
WORLDWIDE

Dear visitors,

we are currently participating in the project „**nutritionDay in Intensive Care Unit**“

nutritionDay is a worldwide initiative to:

- Improve nutrition in healthcare facilities
- worldwide comparison of practice in intensive care units
- Scientific research into the nutrition of individual intensive care patients

The survey does not involve any additional blood tests or tests and does not burden your relatives.

You can get information about participation from the unit team at any time.
